Fourth Year BE SCHEME & SYLLABUS

Autonomous Scheme 2021-22

# Computer Science & Business Systems

ST JOSEPH ENGINEERING COLLEGE AN AUTONOMOUS INSTITUTION Vamanjoor, Mangaluru - 575028

#### ΜΟΤΤΟ

Service and Excellence

#### VISION

To be a global premier Institution of professional education and research

#### MISSION

- Provide opportunities to deserving students of all communities, the Christian students in particular, for quality professional education
- Design and deliver curricula to meet the national and global changing needs through student-centric learning methodologies
- Attract, nurture and retain the best faculty and technical manpower
- Consolidate the state-of-art infrastructure and equipment for teaching and research activities
- Promote all-round personality development of the students through interaction with alumni, academia and industry
- Strengthen the Educational Social Responsibilities (ESR) of the Institution

# **ST JOSEPH ENGINEERING COLLEGE**

An Autonomous Institution Vamanjoor, Mangaluru - 575028

Affiliated to VTU - Belagavi & Recognized by AICTE New Delhi NBA – Accredited: B.E.(CSE, ECE, EEE, ME and CIV) & PG (MBA and MCA) NAAC – Accredited with A+

> **B.E. SCHEME & SYLLABUS** (With effect from 2021-22)

**Computer Science and Business Systems** 

## FOURTH YEAR

(VII and VIII Semester)

#### AUTONOMY AND ACCREDITATION

St Joseph Engineering College (SJEC) is an Autonomous Institute under Visvesvaraya Technological University (VTU), Belagavi, Karnataka State, and is recognized by the All-India Council for Technical Education (AICTE), New Delhi. SJEC is registered under the trust "Diocese of Mangalore, Social Action Department".

The SJEC has been conferred Fresh Autonomous Status from the Academic Year 2021-22. The college was granted autonomy by the University Grants Commission (UGC) under the UGC Scheme for Autonomous Colleges 2018 and conferred by VTU. The UGC Expert Team had visited the college on 28-29 November 2021 and rigorously assessed the college on multiple parameters. The fact that only a handful of engineering colleges in the state have attained Autonomous Status adds to the college's credibility that has been on a constant upswing. Autonomy will make it convenient for the college to design curricula by recognizing the needs of the industry, offering elective courses of choice and conducting the continuous assessment of its students.

At SJEC, the Outcome-Based Education (OBE) system has been implemented since 2011. Owing to OBE practised at the college, SJEC has already been accredited by the National Board of Accreditation (NBA). Five of the UG programs, namely Computer Science & Engineering, Mechanical Engineering, Electronics and Communication Engineering, Electrical & Electronics Engineering and Civil Engineering and two of the PG programs, namely, MBA and MCA programs, have accreditation from the NBA.

Also, SJEC has been awarded the prestigious A+ grade by the National Assessment and Accreditation Council (NAAC) for five years. With a Cumulative Grade Point Average (CGPA) of 3.39 on a 4-point scale, SJEC has joined the elite list of colleges accredited with an A+ grade by NAAC in its first cycle. The fact that only a small percentage of the Higher Education Institutions in India have bagged A+ or higher grades by NAAC adds to the college's credibility that has been on a constant upswing.

The college is committed to offering quality education to all its students, and the accreditation by NAAC and NBA reassures this fact. True to its motto of "Service and Excellence", the college's hard work has resulted in getting this recognition, which has endorsed the academic framework and policies that the college has been practicing since its inception. The college has been leveraging a flexible choice-based academic model that gives students the freedom to undergo learning in respective disciplines and a transparent and continuous evaluation process that helps in their holistic development.

#### **ABOUT THE DEPARTMENT**

Artificial Intelligence (AI) and Machine Learning (ML) are being looked as the drivers for the next industrial revolution happening in the world today. Artificial Intelligence has been utilized in various fields like Medicine, Language processing, Finance, Education, Transportation, Business, Law and more.

Artificial Intelligence is the branch of Computer Science that emphasizes the development of intelligent machines which think and work like humans. With the advancement in technology, we are already connected to AI in one way or the other – whether it is Siri, Watson or Alexa. More and more companies are investing resources in Machine Learning (ML), indicating a robust growth in AI products and apps in the near future.

AI and ML are integral parts of data science, where techniques from both such as regression, predictive analytics and more are applied for insight generation. Job Opportunities for AI & ML engineers such as - Business Intelligence Developer, Research Scientist, Full stack developer, Software architect, Data analyst, Data warehouse engineer and Product manager are highly demanding. Demand for AI and ML engineers is projected to be 1,25,00 in the next five years.

The four-year engineering course in AI and ML at SJEC offers subjects like Introduction to Sensors, ML with Python, Big Data Analytics, Natural Language Processing (NLP), Applied Statistics, Expert System, Fuzzy Logic, Virtual Reality, Robotics Process Automation (RPA), Internet of Things (IoT), Speech Processing, Computation Intelligence, Pervasive Computing, Knowledge and Data Engineering, ML and AI for Healthcare & Agriculture, Deep Learning, Game Theory, etc.

#### **DEPARTMENT VISION**

To impart value-based quality education with the motive of transforming mankind with excellence and competing areas of engineering, technology and management.

#### **DEPARTMENT MISSION**

- 1. Focus on the practical aspects of the curriculum to make learning a meaningful and interesting experience.
- 2. Encourage active collaboration with industries, communities, and fellow institutions within the country and abroad.
- 3. Infuse strong moral and ethical principles in students in order to make them conscientious citizens and excellent human beings.
- 4. Cultivate the competitive spirit required for success.

#### **PROGRAM EDUCATIONAL OBJECTIVES (PEOs)**

- 1. To provide students with a solid foundation and the ability to use engineering concepts, mathematics, physics, and humanities required to develop, analyse, design, and implement solutions to the problems in intelligent computing and business systems.
- 2. To develop in students, the knowledge of computer science and engineering to work in domains such as artificial intelligence, machine learning and data science.
- 3. To foster in students, the capacity of teamwork through efficient communication in multidisciplinary projects.
- 4. To prepare students for building successful careers in artificial intelligence, data science and business systems to meet the needs of society while incorporating professional ethics.
- 5. To inspire learners to pursue higher education in their desired fields and engage in research.

### **PROGRAM OUTCOMES (POs)**

Engineering Graduates will be able to:

**1. Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and engineering specialization to the solution of complex engineering problems.

**2. Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**3. Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**4. Conduct investigations on complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and the synthesis of information to provide valid conclusions.

**5. Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**6.** The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

**7. Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**8. Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

**9. Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**10. Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**11. Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and a leader in a team, to manage projects and in multidisciplinary environments.

**12. Life-long learning:** Recognize the need for and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

### PROGRAM SPECIFIC OUTCOMES (PSOs)

- 1. **Entrepreneurship and Freelancing**: Recognize the tenets of entrepreneurship, freelancing and the prerequisites for starting a business in the IT or related fields.
- 2. **Competitive Exams**: Participate skillfully in competitive examinations for certification, professional advancement, and admission to higher studies.

Note: Research Internship / Industry Internship is to be carried out during the 8<sup>th</sup> semester for 15 weeks.

AICTE Activity Points to be earned by students admitted to BE/B.Tech/B. Plan day college programme (For more details refer to Chapter 6, AICTE Activity Point Programme, Model Internship Guidelines): Over and above the academic grades, every student admitted to the 4 years Degree programme and every student entering 4 years Degree programme through lateral entry, shall earn 100 and 75 Activity Points respectively for the award of degree through AICTE Activity Point Programme. Students transferred from other Universities to fifth semester are required to earn 50 Activity Points from the year of entry. The Activity Points earned shall be reflected on the student's eighth semester Grade Card. The activities can be can be spread over the years, anytime during the semester weekends and holidays, as per the liking and convenience of the student from the year of entry to the programme. However, minimum hours' requirement should be fulfilled. Activity Points (non-credit) have no effect on SGPA/CGPA and shall not be considered for vertical progression. In case students fail to earn the prescribed activity Points, Eighth semester Grade Card shall be issued only after earning the required activity Points. Students shall be admitted for the award of degree only after the release of the Eighth semester Grade Card.

# **VII Semester**

	Digital Image Processing		
Course Code	21CBS701	CIE Marks	50
Course Type	Theory	SEE Marks	50
(Theory/Practical/Integrated)	Theory	Total Marks	100
Teaching Hours/Week (L:T:P)	2:2:0	SEE	3 Hours
Total Hours	40 Hours	Credits	03

Course Learning Objectives: The objective of the course is to

- Understand the fundamentals of digital image processing.
- Know the image enhancement techniques used in digital image processing.
- Learn the image restoration techniques, Morphological Operations and Segmentation used in digital image processing.
- Apply the digital image processing techniques in real-time captured images.

# Module-1: Digital Image Fundamentals8 hoursDigital Image Fundamentals: What is Digital Image Processing? Origins of Digital ImageProcessing, Examples of fields that use DIP, Fundamental Steps in Digital Image Processing,<br/>Components of an Image Processing System, Elements of Visual Perception, Image Sensing and<br/>Acquisition, Image Sampling and Quantization, Some Basic Relationships between Pixels, Linear and<br/>Nonlinear Operations.

#### TB1: Ch 1, Ch 2- 2.1 to 2.5, 2.6.2

Module-2: Spatial and Frequency Domain

**Spatial Domain:** Some Basic Intensity Transformation Functions, Histogram Processing, Fundamentals of Spatial Filtering, Smoothing Spatial Filters, Sharpening Spatial Filters. **Frequency Domain**: Preliminary Concepts, The Discrete Fourier Transform (DFT) of Two Variables, Properties of the 2-D DFT, Filtering in the Frequency Domain, Image Smoothing and Image Sharpening Using Frequency Domain Filters, and Selective Filtering.

TB1: Ch 3 - 3.2 to 3.6, Ch 4 - 4.2, 4.5 to 4.10

Module-3: Image Restoration

**Restoration:** Noise models, Restoration in the Presence of Noise Only using Spatial Filtering and Frequency Domain Filtering, Linear, Position-Invariant Degradations, Estimating the Degradation Function, Inverse Filtering, Minimum Mean Square Error (Wiener) Filtering, and Constrained Least Squares Filtering.

TB1: Ch 5 - 5.2 to 5.9

Module-4 Processing Images

**Color Image Processing:** Color Fundamentals, Color Models, and Pseudo-color Image Processing **Wavelets:** Background, Multiresolution Expansions. **Morphological Image Processing** Preliminaries, Erosion and Dilation, Opening and Closing, The Hit-or-Miss Transforms, and Som Basic Morphological Algorithms.

**TB1:** Ch 6 - 6.1 to 6.3, Ch 7 - 7.1, 7.2, Ch 9 - 9.1 to 9.

Module-5: Image Segmentation

**Segmentation:** Introduction, classification of image segmentation algorithms, Detection of Discontinuities, Edge Detection, Hough Transforms and Shape Detection, Corner Detection, and Principles of Thresholding. **Representation and Description:** Representation, and Boundary descriptors.

TB2: Ch 9 - 9.1 to 9.7, TB 1: Ch 11 - 11.1, 11.2

Course Outcom	es: At the end of the course the student will be able to:
21CBS701.1	Describe the basics of image processing concepts through mathematical interpretation.
21CBS701.2	Apply Image Enhancement techniques in both the spatial and frequency (Fourier) domains.

8 hours

8 hours

8 hours

8 hours

21CBS701.3	Make use of Image Restoration process and its respective filters
21CBS701.4	Analyze different Morphological image processing techniques and Color processing.
21CBS701.5	Apply the Methodologies for Edge and Shape detection and Segmentation process.
21CBS701.6	Develop independent study for Image Processing Techniques in real-life use cases.

Module-5: Market	ting Research Application	8 hours								
Applications of Marketing Research: Introduction, Consumer Market Research, Business-to- Business Market Research, Product Research, Product Adoption decisions, Pricing Research, Motivational Research, Distribution Research, Advertising Research, Media Research, Sales Analysis and Forecasting, Product prototypes, evaluating prototypes, Luxury and Lifestyle products. Case studies and practical examples of successful marketing research projects. Predictive analytics in marketing. <b>TB1: Ch 24</b>										
Course Outcon	<b>nes:</b> At the end of the course the student will be able to:									
21CBS7031.1	Explain the significance and opportunities of marketing contemporary business environments.	research	in							
	13									

Sociocultural Environment, Economic Environment, Legal Environment, Consumer/Demographic Environment, Government policies, Political environment. Contemporary Indian Marketing Environment. Market Segmentation, Targeting & Positioning (STP). Understanding marketing mix. Product development and lifecycle management. TB2: Ch 1.2

8 hours report writing, types of research report, report structure, guidelines for effective documentation.

**TB1: Ch1** 

**Module-2: Research Design and Data Collection** Meaning and significance - Types: Exploratory and Conclusive Research Design. Formulating research objectives and hypotheses. Designing research methodologies (surveys, experiments, interviews, etc.). Sampling techniques and sample size determination. Data collection methods: online surveys, focus groups, observational research, etc. Data analysis techniques: quantitative analysis and qualitative analysis. Design and implementation of Marketing Research Projects.

Exploring the different types of marketing research (qualitative and quantitative). Ethical

**Expert Systems:** Basic Concepts of Expert Systems, Applications of Expert Systems, Structure of Expert Systems, Knowledge Engineering, Problem Areas Suitable for Expert Systems, Development of Expert Systems, Benefits, Limitations, and Critical Success Factors of Expert Systems.

Case Study: Application of expert systems. **TB1** 

<b>Course Outcomes:</b> At the end of the course the student will be able to:							
21CBS7033.1	Apply the types of data to the Decision Support systems and Business Intelligence framework.						
21CBS7033.2	Apply the decision making process and DSS concepts in the business applications supporting problem resolution						
21CBS7033.3	Analyze the importance of data warehousing and business reporting tools to perform descriptive analytics for business issues in the organizations.						
21CBS7033.4	Analyze the relevance of data mining based predictions in decision making to perform prescriptive analytics for business decisions in the organizations.						
21CBS7033.5	Analyze the value of model based and expert systems in the decision-making process and also discuss areas suitable for application of expert system.						
21CBS7033.6	Analyze the influence of technologies & business intelligence in overcoming the issues in various business application cases.

Course Outcomes: At the end of the course the student will be able to:								
21CBS7034.1	Explain the fundamental building blocks of Blockchain technology.							
21CBS7034.2	Discuss the concepts of Bitcoin and their usage in various blockchain applications.							
21CBS7034.3	Use the concept of smart contracts and Ethereum and their application in various applications							
21CBS7034.4	Execute smart contract using Solidity, Remix IDE and Ethereum frameworks.							
21CBS7034.5	Analyze Hyperledger fabric including its framework, design principles and architecture							

21CBS7034.6

Develop block chain-based solutions by using the concepts learnt to solve real world problems.

Total Hours	40 Hours	Credits	03			
Course Learning Objectives:	The objective of the course is to					
• Understand the core conce	pts and components of enterprise sys	stems.				
• Analyze enterprise system	architecture and database manageme	ent.				
• Develop skills in planning	and implementing enterprise system	S.				
• Explore the fole of enterpr	ise systems in enhancing business re	lationships.				
Module-1: Introduction to End	erprise System		8 hours			
<ul> <li>Enterprise systems in Organizations: Information Silos and Systems Integration. Enterprise</li> <li>Resource Planning Systems: What Is an ERP? Evolution of ERP, Business Process and ERP,</li> <li>ERP System Components, ERP Architecture, e-Business and ERP, Benefits and Limitations of ERP.</li> <li>Systems Integration: Logical Vs. Physical SI, Steps in Integrating Systems, Benefits of System</li> <li>Integration, Limitations of System Integration. ERP and Systems Integration: ERP's Role in</li> </ul>						
Module-2: Enterprise System A	rchitecture		8 hours			
EDD Association of the strength of the strengt	melitertere Errenels Denefiterend	I inside die men XV				
Management and SOA, Clou Implementation Plan, ERP Imple Life Cycles, ERP Life Cycle Vs. Module-3: Implementation and	Architectures, Service-Oriented Architectures, SOA and Web Services, Enterprise Content Management and SOA, Cloud Architecture. <b>ERP Implementation Life Cycle</b> : ERP Implementation Plan, ERP Implementation Methodology, Traditional ERP Life Cycle, Rapid ERP Life Cycles, ERP Life Cycle Vs. SDLC. <b>TB1: Ch3, 4</b> Module-3: Implementation and Deployment of Enterprise system 8 hours					
<b>ERP Components:</b> Hardware, Party Products, What Are They Support Overcoming Third-Par Understanding Transactional and Administration. <b>Critical Success</b> Change Management, Implement	<b>ERP Components:</b> Hardware, Software, People Resources. <b>ERP and Virtualization</b> . Third-Party Products, What Are They and Why Are They Needed? Impacts of Integration with ERP, Support Overcoming Third-Party Integration Issues, Middleware. <b>Database Requirements:</b> Understanding Transactional and Reporting Needs, Selecting the Database, Staffing and Database Administration. <b>Critical Success Factors</b> : Decision-Making Process, Project Scope, Teamwork, Change Management Implementation Team and Executive Team. <b>TB1:Ch 5</b> . 8					
Module-4: Business Relationsl	nips and Enterprise System		8 hours			
<b>Business Process Change:</b> Business Process Reengineering, BPR Methodology, Current BPR Tools. <b>Business Process Management:</b> Difference between BPR and BPM, Best Practices of BPM, BPM Software Vendors, Core Business Processes, Optimizing Business Processes, Benefits of Implementing BPM. <b>Outsourcing:</b> What Is Outsourcing? Outsourcing Drawbacks, Offshore Outsourcing, Software as a Service, Outsourcing Best Practices. <b>TB1:Ch9, 10</b>						
Module-5: Supply Chain and Customer Relationship Management8 hours						
<b>Supply Chain Management:</b> SCM Drivers, SCM Flows, SCM Processes. <b>e-Business and</b> <b>Supply Chain Management:</b> e-Procurement, Collaborative Design and Product Development, ERP System and Supply Chain. <b>Integration</b> : Supply Chain Integration, Integrating ERP and SCM Systems. <b>Customer Relationship Management:</b> What is CRM? Customer Relationship Processes, CRM Technology, CRM Life Cycle. <b>TB1:Ch 11, 12</b>						
Course Outcomes. At the end o	f the course the student will be able	to:				
			1			
<b>21CBS7035.1</b> Explain the function integration.	indamental concepts of enterprise	systems, ERP,	and systems			

21CBS7035.3	Apply strategic planning techniques to implement and deploy enterprise systems effectively.						
21CBS7035.4	Demonstrate ERP, CRM, and SCM systems for optimizing business processes and enhancing organizational efficiency.						
21CBS7035.5	Analyze the impact of enterprise systems on business relationships with customers and suppliers						
21CBS7035.6	Compare emerging trends and technologies in enterprise systems for future business integration and innovation.

**Course Articulation Matrix** 

Behavioral Economics						
Course Code	21CBS7044	CIE Marks	50			
Course Type	Theory	SEE Marks	50			
(Theory/Practical/Integrated)	Theory	Total Marks	100			
Teaching Hours/Week (L:T:P)	3:0:0	SEE	3 Hours			
Total Hours	40 Hours	Credits	03			

**Course Learning Objectives:** The objective of the course is to

• Impart knowledge on current ideas and concepts in Economics.

- Provide insight on current ideas and concepts regarding decision making in Economics.
- Describe different types of theories and models related to Economics.
- Make the students understand various theories that help in making a choice under uncertainty

#### **Module-1: Introduction**

The neoclassical/standard model and behavioral economics in contrast; historical background; behavioral economics and other social sciences; theory and evidence in the social sciences and in behavioral economics; applications – gains and losses, money illusion, charitable donation. Ch 1

#### **Module-2: Basics of Choice Theory**

Revisiting the neoclassical model; utility in economics and psychology; models of rationality; connections with evolutionary biology and cognitive neuroscience; policy analysis consumption and addiction, environmental protection, retail therapy; applications pricing, valuation, public goods, choice anomalies.

#### **Ch 2**

#### Module-3: Beliefs, Heuristics, and Biases

Revisiting rationality; causal aspects of irrationality; different kinds of biases and beliefs; selfevaluation and self-projection; inconsistent and biased beliefs; probability estimation; trading applications trade in counterfeit goods, financial trading behavior, trade in memorabilia.

Choice under Uncertainty: Background and expected utility theory; prospect theory and other theories; reference points; loss aversion; marginal utility; decision and probability weighting; applications ownership and trade, income and consumption, performance in sports.

#### Ch 4,5

#### **Module-4: Intertemporal Choice**

Geometric discounting; preferences over time; anomalies of intertemporal decisions; hyperbolic discounting; instantaneous utility; alternative concepts – future projection, mental accounts, heterogeneous selves, procedural choice; policy analysis – mobile calls, credit cards, organization of government; applications – consumption and savings, clubs and membership, consumption planning.

#### Ch 7,8

#### **Module-5: Strategic Choice**

Review of game theory and Nash equilibrium – strategies, information, equilibrium in pure and mixed strategies, iterated games, bargaining, signaling, learning; applications - competitive sports, bargaining and negotiation, monopoly and market entry. Individual preferences; Choice anomalies and inconsistencies; social preferences; altruism; fairness; reciprocity; trust; learning; communication; intention; demographic and cultural aspects; social norms; compliance and punishment; inequity aversion; policy analysis - norms and markets, labor markets, market clearing, public goods; applications – logic and knowledge, voluntary contribution, compensation design.

Ch	9,	10

<b>Course Outcomes:</b> At the end of the course the student will be able to:					
21CBS7044.1	Explain the models in behavioral economics in relation to social sciences.

21CBS7044.2	Illustrate the basics of choice theories along with cognitive neurosciences, evaluate and analyze strategic choice, anomalies, and their applications.
21CBS7044.3	Demonstrate an understanding of beliefs, heuristics, biases, and choices under uncertainty.
21CBS7044.4	Apply the intertemporal choices and their application.
21CBS7044.5	Analyze the strategic choice.
21CBS7044.6	Analyze the strategic anomalies and strategic applications.

Cry	ptography and Cyber Security		
Course Code	21CB\$7045	CIE Marks	50
Course Type		SEE Marks	50
(Theory/Practical/Integrated)	Theory	Total Marks	100
Teaching Hours/Week (L:T:P)	3:0:0	SEE	3 Hours
Total Hours	40 Hours	Credits	03
Course Learning Objectives: Th	e objective of the course is to		
Analyze classical encryption	techniques for practical application		
• Understand the principles	and workings of block ciphers	along with the	eir practical
applications.			
Acquire knowledge of public	c-key cryptography, and other public	c-key cryptosyste	ems.
• Explore various aspects of c	cybercrime, including its definition,	origins, classific	cations, legal
perspectives, and preventive	measures.		
Module-1: Classical Encryption	Fechniques		8 hours
Information and Network Securi	ity Concepts: Cybersecurity, Inform	nation Security a	and Network
Security, OSI Security Architectu	re, Security Attacks, Security Ser	vices, Security I	Mechanisms,
Cryptography, Network Security, T	rust and Trustworthiness, Standards		
Classical Encryption Techniq	ues: Symmetric Cipher Model	, Substitution	Techniques,
Transposition Technique.			
Block Ciphers and the Data Enci	cyption Standard: Traditional Bloc	k Cipher Structu	re, The Data
Encryption Standard, A DES Exam	ple, The Strength of DES, Block Ci	pher Design Prin	ciples
<b>IBI:</b> Ch 1, 3, 4			0.1
viodule-2: Block Cipner Operation	on		8 hours
Block Cipher Operation: Multip	ple Encryption and Triple DES, H	Electronic Codeb	ook, Cipher
Block Chaining Mode, Cipher Feed	dback Mode, Output Feedback Mod	le, Counter Mod	e, XTS-AES
Mode for Block-Oriented Storage I	Devices, Format-Preserving Encrypt	ion.	
Public-Key Cryptography and	<b>RSA:</b> Principles of Public-Key	Cryptosystems,	The RSA
Algorithm.			
101: Cli 7, 9 Module 3: Introduction: Why Cy	horsocurity		8 hours
violule-3: Introduction: why Cy			onours
Introduction: Why Cybersecurity	y? Information Security and Cybers	security, How Do	Computers
Work Together?, Cyberattacks	loday, Security largets, <b>lechni</b>	que and Hum	an Beings:
Psychological Attacks, Phisning, H	IT Systems Countermoscures Da	gical Allacks Be	Prevented ?.
<b>KISK :</b> What IS KISK?, Infeats in Security Analysis Disk Managema	TI Systems, Countermeasures, Ki	isk Management.	, Systematic
TR2. Ch 1 2 3	in as a FDCA Flocess.		
1 <b>D</b> 2. Cli 1, 2, 3			
Module-4: Cybercrime			8 hours
Introduction to Cybercrime: In	troduction, Cybercrime: Definition	and Origins of	f the Word,
Cybercrime and Information Secu	urity, Classifications of Cybercrin	nes, Cybercrime:	The Legal
Perspective, Cybercrimes: An Indi	an Perspective, Cybercrime and the	e Indian ITA 200	00, A Global
Perspective on Cybercrimes, Cyber	crime Era.		
Cyber offences: How criminals ]	plan them: Introduction, how crim	inals plan the at	tacks, Social
Engineering, Cyberstalking, Cybers	café and Cybercrimes, Botnets, Atta	ck Vector, Cloud	Computing
TB3: Ch 1, 2			
Module-5: Tools used in Cyber (	Crime and Forensics		8 hours
Tools and Methods used in Cybe	rcrime: Introduction, Proxy Server	s and Anonymize	ers, Phishing
Password Cracking, Keyloggers and	nd Spywares, Virus and Worms, T	rojan Horses and	d Backdoors
Steganography, DoS and DDoS	Attacks, SQL Injection, Buffer Ov	verflow, Attacks	on Wireless

Networks. Understanding Computer Forensics: Introduction, Historical Background, Digital Forensics Science, The need for Computer Forensics, Cyberforensics and Digital Evidence, Forensics Analysis of E-Mail, Digital Forensics Life Cycle, Chain of Custody Concept, Network Forensics Approaching a Computer Forensics Investigation, Setting up a Computer Forensic Lab, Compute Forensic and Steganography, Relevance of OSI 7 Layer Model to Computer Forensics, Forensics and Social Networking Sites, Computer Forensics from Compliance Perspective, Challenges in Computer Forensics, Special Tools and Techniques, Forensics auditing, Antiforensics. **TB3: Ch 4, 7** 

Course Outcom	<b>Course Outcomes:</b> At the end of the course the student will be able to:			
21CBS7045.1	Identify the vulnerabilities in any computing system and explain the basics of cryptography techniques for enhancing the security			
21CBS7045.2	Describe different cryptographic algorithms and their applications in network security			
21CBS7045.3	Discuss fundamental cybersecurity concepts used to assess and manage risks in IT systems.			
21CBS7045.4	Analyze the proliferation of mobile and wireless devices and emerging trends in mobility and their implications for cybersecurity.			
21CBS7045.5	Analyze the importance of legal aspects of cybercrime, need for cyber law and computer forensics.			
21CBS7045.6	Develop the attribute of self-learning, skill of oral and written communication and ability to work in teams to solve real world cybercrime scenarios.

Course Learning Objectives: The objective of the course is to

- Understand major deep neural network frameworks and issues in basic neural networks.
- Solve real-world applications using Deep learning.
- Select suitable deep learning approaches for given application.
- Demonstrate the working of Tensor Flow for Deep Neural Networks.

Module-1: Introduction to Neural Networks and Deep Neural Networks 8 Hours

What is Deep Learning, Math behind Deep Learning- linear algebra and statistics, Vector Data. Time Series Data. Image Data. Video Data. How does machine learning work, Evaluating the Machine Learning models. Neural Networks, The Biological Neuron, The Perceptron, Multilayer Feed-Forward Networks.

TB1: Ch 1

#### Module-2: Training feed-forward Neural Network

Training Neural Networks-Backpropagation Learning, Activation Functions- Linear, Sigmoid, Tanh, Softmax, Rectified Linear Loss Functions-Loss Functions for Regression, Loss Functions for Classification, Hyperparameters- Learning Rate, Regularization, Momentum, Sparsity, Implementation of neural network using TensorFlow.

#### **TB1: Ch 2**

#### Module-3: Convolutional Neural Network

Foundations of Convolutional Neural Networks – CNN operations – Architecture – Simple Convolution Network – Deep Convolutional Models – ResNet, AlexNet, Inception Net and others. TB 1: Ch 7 , TB2: Ch 8

#### Module-4: Models for Sequence analysis

Recurrent Neural Networks, The Challenges with Vanishing Gradients, Long Short-Term Memory (LSTM) Units, TensorFlow Primitives for RNN Models, implementing a Sentiment Analysis Model, Solving seq2seq Tasks with Recurrent Neural Networks. **TB2: Ch 7** 

#### Module-5: Introduction to Auto Encoders and GAN

Autoencoders: Efficient data representation, Performing PCA, Stacked, Autoencoders, Denoising, Sparse autoencoders, variational and other autoencoders. Generative Adversarial Networks. TB1: Ch 4, 5 , TB2: Ch 10

Course Outcomes: At the end of the course the student will be able to:				
21CBS7051.1	<b>21CBS7051.1</b> Describe the basic concepts of Neural Networks and Deep Learning.			
21CBS7051.2	Make use of Tensor Flow to build neural network model.			
21CBS7051.3	Identify Convolutional Neural Network for a given scenario			
21CBS7051.4	Select Deep Learning models for sequence analysis.			
21CBS7051.5	Apply the concept of Autoencoders and GAN.			
21CBS7051.6	Build Deep learning models for Real-world applications.

**Course Learning Objectives:** The objective of the course is to

- Expose students to the design process as a tool for innovation.
- Develop students' professional skills in client management and communication.
- Demonstrate the value of developing a local network and assist students in making lasting connections with the business community.
- Develop a portfolio of work to set them apart in the job market.

**Module-1: Introduction to Design Thinking and Product Design** What Is Design Thinking, really? The Butterfly Effect and Long-Range Planning, Applied Design

Thinking Is Strategic Innovation, Time to Think beyond Crisis Mode, Changing Management Paradigms, Foundation Building for Design Thinking Project: Scoping of design challenge, Phase I Explore, methods & tools, steep analysis, strategic priorities, activity system.

**TB 1: Ch 1.2** 

**Module-2: Team Work and Service Design** 

Applied Design Thinking in Business and Strategy: Design Thinking to the Rescue, We've Lost Touch with What's around Us, Every Future Business Leader Needs to Be a Good Design Thinker, the 10 Design Thinking Principles That Redefine Business Management, stakeholder mapping, opportunity framing, Phase II empathize, methods & tools, field observation deep user interview. **TB 1: Ch 3** 

**Module-3: Business or Systems Design** 

Business Challenge 01: Growth, Business Challenge 02: Predictability, Business Challenge 03: Change, Business Challenge 04: Maintaining Relevance, Business Challenge 05: Extreme Competition, Business Challenge 06: Standardization, Business Challenge 07: Creative Culture Business Challenge 08: Strategy and Organization, Phase II: needs finding, SPICE Needs Framework.

#### **TB 1: Ch 4**

Module-4: Methods and Tools to Ideate, Prototype Phase

Hiring Design Thinkers Is Not Enough, We Need to Create Design Thinking Companies, persona development, Team Building Activity, Phase III: Experiment, methods & tools, ideation using scamper, ideation using analogous inspiration, ideation using deconstruct & reconstruct, user experience journey, prototyping.

TB 1.3: Ch 5

#### **Module-5: Solution Overview**

Phase IV Engage, Storytelling, Storyboarding, Co-Creation, Phase V: Evolve, Concept Synthesis, Strategic Requirements (Advancing from Ideas to Reality, Activity System Integration, Viability Analysis (Impact Evaluation, Innovation Tool Using User Needs, Cap, 4s, Change Management Tool Using Review, Quick Wins, Action Planning to Advance Design Challenge Project, Explore, Emphasize Phase, Templates.

**TB 3: Ch 1,2,3,4** 

<b>Course Outcomes:</b> At the end of the course the student will be able to:						
<b>21CBS7053.1</b> Develop a strong understanding of the Design Process and how it can be applied in a variety of business settings						
21CBS7053.2	Outline a problem, apply methods of empathy on user groups.					
21CBS7053.3	Develop and test innovative ideas through a rapid iteration cycle,					

#### 8 hours

8 hours

8 hours

8 hours

8 hours

21CBS7053.4	Apply ideation tools to generate ideas to solve problems, create physical prototypes / a visual representation of an idea.
21CBS7053.5	Develop a prototype, test the ideas and demonstrate story telling ability to present the ideas.
21CBS7053.6	Understand the long term impact of design decisions, and to take ownership of the quality of their work and final products

Technical Seminar					
Course Code	21CBS706	CIE Marks	100		
Course Type	Drastical	SEE Marks	-		
(Theory/Practical/Integrated)	Practical	Total Marks	100		
Teaching Hours/Week (L:T:P)	(0:0:2)	SEE	-		
Total Hours	20 hours	Credits	01		

#### Course Learning Objectives:

- 1. To equip students with the ability to conduct in-depth research, analyze technical literature, and explore contemporary advancements in their field of study.
- 2. To effectively organize, design, and deliver technical presentations that convey complex information clearly to a diverse audience.
- 3. To encourage students to critically analyse and evaluate emerging trends, technologies, or methodologies relevant to their chosen seminar topic.
- 4. To enable students to improve their written and oral communication by preparing wellstructured seminar reports and articulating ideas confidently during presentations.
- 5. To stimulate independent learning and problem-solving abilities by allowing students to explore specific topics of interest, enhancing self-directed research and learning.
- 6. To prepare students to effectively discuss and defend their technical knowledge in a professional setting, such as viva-voce, aligning with future industry or academic pursuits.

#### **1. Selection of Technical Seminar Topic**

- Students should select a technical topic related to their field of study, preferably focusing on recent advancements or emerging technologies. Inter-disciplinary/Multi-disciplinary topics are appreciated.
- Topics must be approved by the seminar coordinator within the first few weeks of the semester.

#### 2 Research and Preparation

- Extensive research should be carried out using credible sources such as research papers, technical journals, books, and online databases.
- A minimum of 10-20 references is recommended, ensuring a mix of primary and secondary sources.

#### 3. Seminar Report

- A detailed report (approximately 20-30 pages) must be prepared, summarizing the research findings and organized in a structured manner.
- The report should include sections like introduction, literature review, methodology, results, discussion, conclusion, and references.
- The report should follow a standard format as prescribed by the Department (font, spacing, citation style, etc.).

#### 4. Oral Presentation

- Students must deliver an oral presentation lasting 15-20 minutes, followed by a question-and-answer session.
- Presentations should be well-structured, with appropriate use of visuals (slides, graphs, diagrams) to clearly convey technical content.
- All presentations must be conducted on scheduled dates, and attendance is mandatory for both presenters and all other students.

	presenters and an other students.
	5. Question and Answer Session
•	After the presentation, students will face a viva-voce where they are required to answer questions posed by the Departmental Seminar Evaluation Committee regarding their seminar
	topic.
•	The viva will test the student's depth of understanding, research analysis, and ability to think critically about the subject matter.

#### 6. Evaluation Criteria

- Seminar Report: Clarity, technical depth, comprehensiveness, quality of research, organization, and adherence to format (50 marks).
- **Oral Presentation**: Communication skills, visual aids, clarity of content, timing, etc. (25 marks).
- **Viva-Voce**: Ability to answer questions effectively, depth of understanding, and analytical skills (25 marks).

#### 7. Submission Deadlines

- The report should be submitted at least one week prior to the scheduled presentation date.
- Late submissions will be penalized as per department rules.

#### 8. Plagiarism Check

- All seminar reports must be subjected to plagiarism checking, and the similarity index should be within acceptable limits specified by the Department.
- Instances of plagiarism will result in penalties, which could include rejection of the report or a reduction in marks.

#### 9. Mentorship and Feedback

- Students are required to consult with their faculty mentors regularly throughout the preparation phase to seek guidance and feedback.
- At least three mentorship meetings should be recorded before the final presentation.

#### **10. Attendance**

- Students must attend all seminar sessions conducted by their peers, as it promotes collaborative learning and constructive feedback.
- Attendance could be considered for internal evaluation.

**Course Outcomes:** At the end of the course the student will be able to :

21CBS706.1	Demonstrate a thorough understanding of a specialized topic by conducting extensive research and presenting technical content effectively.
	entensive research and presenting technical content encervery.
21CBS706.2	Exhibit proficiency in delivering well-organized and visually supported oral
	presentations, clearly articulating complex technical ideas to an audience.
21005706 2	Apply oritical thinking and research methodologies to explore applying and
21CB5/00.3	Apply chucal uniking and research methodologies to explore, analyze, and
	synthesize information from various sources leading to sound conclusions
	synthesize information from various sources, reading to sound conclusions.
21CBS706.4	Prepare a detailed and well-structured seminar report that adheres to technical
	writing standards, showcasing the ability to document research findings
	comprehensively
	comprehensivery.
21CBS706.5	Respond confidently and competently to questions during the viva-voce, defending
	the technical work and domonstrating on in donth understanding of the tonic
	the technical work and demonstrating an in-depth understanding of the topic.
21CBS706.6	Engage actively in peer seminars, providing constructive feedback, and reflecting on
	insights gained from discussions with fellow students and faculty.

**Course Articulation Matrix** 

1: Low 2: Medium 3: High

Major Project Work								
Course Code	21CBP707	CIE Marks	50					
Course Type	Drastical	SEE Marks	50					
(Theory/Practical/Integrated)	Practical	Total Marks	100					
Teaching Hours/Week (L:T:P)	(0:0:6)	SEE	3 Hrs					
Total Hours	60 hours	Credits	05					

Course Learning Objectives:

- 1. Utilize fundamental principles of engineering and interdisciplinary knowledge to identify, analyse, and solve complex problems in the project domain.
- 2. Develop and execute a comprehensive project plan that includes designing, prototyping, testing, and evaluating a system, component, or process to meet specific needs and constraints.
- 3. Conduct in-depth research, critically review literature, and integrate innovative solutions or techniques within the project framework.
- 4. Demonstrate effective teamwork, communication, and collaboration skills in a multidisciplinary environment to achieve project objectives.
- 5. Incorporate ethical considerations, societal impact, and sustainable practices in the project development, while adhering to professional engineering standards.
- 6. Prepare and present a well-structured project report, supported by technical documentation and visual aids, and confidently defend the work during project viva-voce or presentations.

#### 1. Project Selection

- **Relevance**: Projects should align with the students' specialization and current industry trends.
- **Innovation**: Projects that offer innovative solutions to existing problems or explore new ideas are encouraged.
- **Feasibility**: The project should be achievable within the given timeframe and resources.
- **Team Composition**: Students can work in teams, typically comprising maximum 4 members.

#### 2. Project Proposal

- **Submission**: Students must submit a detailed project proposal (project synopsis) outlining the problem statement, objectives, methodology, expected outcomes, and a work plan.
- **Approval**: The proposal should be reviewed and approved by the Department Project Evaluation Committee (DPEC).

#### **3. Project Execution**

- **Regular Meetings**: Students should meet regularly with their project-guide to discuss progress, challenges, and next steps.
- **Documentation**: Maintain detailed documentation throughout the project in a project workdairy, including design decisions, experiments, and testing results.
- **Milestones**: Set clear milestones and deadlines to ensure steady progress. These could include design completion, initial prototype, testing, etc.

#### 4. Mid-term Review

- **Progress Presentation**: DPEC shall conduct a mid-term review where students present their progress to a panel of faculty members.
- Feedback: Provide constructive feedback and guidance to help students refine their projects.

#### 5. Final Submission

- **Report**: The final project report should include an abstract, introduction, literature review, methodology, implementation, results, discussion, conclusion, and references.
- Code and Data: If applicable, students should submit their code, datasets, and any other relevant materials.

#### **6. Project Presentations**

• **Oral Presentation**: Students should present their projects to a panel, explaining their work, findings, and contributions.

- **Demonstration**: If possible, include a live demonstration of the project or show relevant simulations and results.
- **Q&A**: Be prepared to answer questions from the panel and justify the project's methodology and conclusions.

#### 7. Evaluation Criteria

- Originality and Innovation: Assess the novelty and creativity of the project.
- **Technical Competence**: Evaluate the depth of technical knowledge and problem-solving ability demonstrated.
- **Project Execution**: Consider the effectiveness of project planning, adherence to timelines, and quality of implementation.
- **Presentation and Communication**: Judge the clarity and coherence of the final report, presentation, and the ability to answer questions.

#### 8. Plagiarism Check

- Academic Integrity: Ensure that the work submitted is original and properly cites all references and sources.
- **Plagiarism Check**: Run all reports through plagiarism detection software and ensure that similarity index is less than the threshold value (25%).

#### 9. Mentorship and Feedback

- **Feedback:** Students are required to consult with their project guide regularly throughout the project work to seek guidance and feedback.
- Weekly Meetings: At least one mentorship meeting every week shall be held and recorded in the project work-dairy.

#### **10. Post Submission**

- **Publication**: DPEC shall encourage students to publish their work in conferences or journals, especially if it contributes significantly to their field.
- **Project Archive**: Store all projects in the department's digital archive for future reference.

Continuous Internal Evaluation (CIE)								
Description	Proposed Dates	CIE Weightage (Max 50 marks)						
<ol> <li>Project Synopsis Evaluation</li> <li>(Phase I)</li> </ol>	Beginning of the 7 <sup>th</sup> Semester	10 marks						
2. Project Progress Evaluation	Middle of the 7 <sup>th</sup> Semester	20 marks						
3. Project Report Evaluation (Phase II)	End of the 7 <sup>th</sup> Semester	20 marks						

#### Semester End Examinations (SEE)

4. SEE will be conducted for 100 marks (after the last working day of the 7<sup>th</sup> semester) in the presence of the external examiner with the weightage as **Project Report: 50 marks**, **Project Presentation: 25 marks and Question & Answer Session: 25 marks**. Marks awarded for Project Report is same for all batch-mates.

• When all the Project Objectives are met and the Project Work is successfully completed and final Project Report is submitted as reported by the Department Project Evaluation Committee (DPEC), the CIE and SEE performance of the 7th semester will be carried forward to the 8th semester. There will not be any separate CIE and SEE for such project batches in the 8th semester.

• In case of any Project Objectives not met, Project Work not completed or final Project Report not submitted, as reported by the DPEC, the CIE and SEE will be conducted in the 7th semester for the completed portion of the Project Work. In such cases, the submission of the Draft Copy of the Project Report is mandatory for evaluation. The remaining part of the project shall be completed during the 8th semester and there will be a CIE and SEE for the Project Work in the 8th semester.

Students are advised to complete the Project Work during the 7th semester and devote the 8th semester for Industry Internship/Research Internship.

Course Outcomes: At the end of the course the student will be able to :							
21CBP707.1	Demonstrate the ability to identify, define, and solve complex engineering						
	problems using appropriate methodologies and modern tools.						
21CBP707.2	Successfully design, develop, and test an engineering solution that meets						
	specified requirements, addressing technical, economic, environmental, and						
	social constraints.						
21CBP707.3	Apply research skills to review existing literature, gather and analyze data, and						
	incorporate innovative or state-of-the-art technologies in the project						
21CBP707.4	Collaborate effectively within a team, taking on leadership or supportive roles						
	as needed, while ensuring clear communication and efficient project						
	management.						
21CBP707.5	Demonstrate awareness of professional ethics, societal impact, and						
	sustainability in the design and implementation of engineering solutions.						
21CBP707.6	Exhibit strong written and oral communication skills by preparing technical						
	reports, project documentation, and delivering persuasive project presentations.

#### **Course Articulation Matrix**

1: Low 2: Medium 3: High

# **VIII Semester**

Massive Open Online Course (MOOC)							
Course Code	21AEC801	CIE Marks	50				
Course Type	Theory	SEE Marks	50				
(Theory/Practical/Integrated)	Theory	Total Marks	100				
Teaching Hours/Week (L:T:P)	(2:0:0)	SEE	3 Hrs				
Total Hours	20 hours	Credits	02				

Course Learning Objectives:

- 1. Enable students to acquire a strong foundation in core engineering subjects through highquality, accessible online resources.
- 2. Facilitate skill development in specific engineering domains using practical exercises, simulations, and projects offered through the MOOC platform.
- 3. Encourage students to develop autonomy in learning by navigating and managing their course content, assignments, and assessments independently.
- 4. Expose students to interdisciplinary concepts and applications, fostering an understanding of how engineering principles integrate with other fields.
- 5. Provide exposure to global best practices and trends in engineering, allowing students to learn from international faculty and peer collaboration.
- 6. Develop essential soft skills by participating in discussion forums, group projects, and peer assessments, enhancing communication and teamwork skills.

#### **1. Selection of MOOCs**

**1.1 Accredited Platforms:** Students shall select MOOCs from accredited platforms such as Coursera, edX, SWAYAM/NPTEL, Udacity, or any online learning platform recognized by the respective Engineering Department / Board of Studies (BoS). Engineering Departments with the approval of BoS shall publish a list of MOOCs courses in the beginning of every semester.

**1.2 Prerequisites:** Students shall ensure that he/she has completed any foundational courses or prerequisites required for the chosen MOOCs.

**1.3 Relevant Courses:** Students shall choose courses that are relevant to the Student's Engineering discipline and career goals. Students shall NOT opt for the course which is part of their curriculum (I to VIII semester B.E program) and Honors Degree/Minor Degree courses. In case of any overlapping in the contents of the MOOC Course with that in the curriculum or other courses, the maximum permitted overlapping in the course contents (syllabus) is 20-25%.

**1.4 Credit Value:** Students shall ensure that the selected MOOCs collectively account for 2 credits. Typically, a 2-credit MOOC will require around 20-25 hours of study and a 1-credit MOOC will require 10-12 hours of study.

**1.5 Duration of Course:** A 4-weeks MOOCs is eligible for 1-credit. Students are advised to enrol for <u>one 8-weeks MOOCs</u> course to earn 2 credits. However, Students can also take <u>two 4-weeks</u> <u>MOOCs</u> instead of one course. In each case, the number of hours of study mentioned shall be satisfied.

#### 2. Approval Process

**2.1 Pre-Approval:** Students must seek pre-approval from the Department MOOCs Coordinator before enrolling in MOOCs.

**2.2 Submission of Proposal:** Students can submit a detailed proposal to Department MOOCs Coordinator including the name of the MOOCs, the platforms, course duration, credit value, and relevance to their field of study.

If a Student has already completed any MOOCs course/s from the beginning of the III semester B.E, that satisfies the criteria mentioned in the clause <u>1. Selection of MOOCs</u>, such course/s can be considered by the Department for credit transfer, provided the student has NOT already claimed the benefit of completing the MOOCs under any assessment in any of the subject.

**2.3 Evaluation:** The Department will evaluate the proposal for relevance, academic rigor, and credit equivalence and will communicate the decision to the Students.

#### 3. Registration and Enrollment

**3.1 Official Enrollment:** Students shall register for the approved MOOCs on the respective platforms.

**3.2 Documentation:** Students shall keep documentation of registration and course details for future reference and provide the same when asked by the Department.

#### 4. Course Completion

**4.1 Active Participation:** Students shall engage actively in all course activities including lectures, assignments, quizzes, and discussion forums.

**4.2 Completion Certificate:** Students shall obtain a verified certificate of completion for MOOC Course. Free versions without certificates are NOT eligible for credit.

#### 5. Assessment and Evaluation

**5.1 Performance Tracking:** Students shall maintain records of performance in all assessments throughout the course.

**5.2 Final Assessment:** The Department may conduct a final assessment (proctored exam) to ensure that the knowledge gained aligns with the academic standards. This summative assessment (proctored exam) by the Engineering Department is mandatory in the absence of such assessment in the MOOC course/s by the online platform.

#### 6. Credit Transfer

**6.1 Submission of Certificates:** Students shall submit the completion certificate/s and performance records to the Department MOOCs Coordinator.

**6.2 Credit Evaluation:** The Department will evaluate the certificates and performance records to approve the credit transfer.

**6.3 Grade Conversion:** College will take care to convert the grades from the MOOCs into the grading system as per established Academic Rules and Regulations.

#### 7. Integration into Academic Record

**7.1 Transcript Update:** Upon approval, the credits and grades will be integrated into the student's academic transcript.

**7.2 Grade Point Average (GPA) Calculation:** The MOOC grades are included in the calculation of the student's GPA.

#### 8. Support and Resources

**8.1 Academic Advising:** The Department MOOCs Coordinator shall provide guidance and support to the students throughout the process.

**8. 2 Technical Support:** The Department MOOCs Coordinator shall ensure that students have access to the necessary technical resources to complete MOOCs courses.

#### 9. Feedback and Improvement

**9.1 Student Feedback:** Department MOOCs Coordinator shall collect feedback from students on their MOOC experiences to improve future implementations.

**9.2 Continuous Improvement:** MOOCs guidelines and processes will be updated based on student feedback, Department feedback and evolving educational standards.

Course Outcomes: At the end of the course the student will be able to :								
21AEC801.1	Students will demonstrate a strong grasp of essential engineering concepts and							
	methodologies relevant to their chosen field.							
21AEC801 2	Students will apply engineering knowledge to solve real-world problems							
21AEC001.2	through projects and case studies presented in the course.							
	Students will proficiently use online tools and resources, including							
21AEC801.3	simulations, interactive modules, and digital libraries, to enhance their learning							
	experience.							
21 A E C 201 4	Students will gain insights into new technologies and innovations within							
21AEC001.4	engineering, preparing them to adapt to technological advancements.							

21 AEC 201 5	Students will exhibit improved teamwork and communication skills by				
21AEC001.5	engaging in online discussions, group projects, and peer assessments.				
	Students will develop a broader understanding of how engineering intersects				
21AEC801.6 with other disciplines and cultural contexts, informed by national					
	perspectives gained through the MOOC.

Major Project Work								
Course Code	21CBP802	CIE Marks	50					
Course Type	Drastical	SEE Marks	50					
(Theory/Practical/Integrated)	Practical	Total Marks	100					
Teaching Hours/Week (L:T:P)	(0:0:2)	SEE	3 Hrs					
Total Hours	20 hours	Credits	05					

Course Learning Objectives:

- 1. Utilize fundamental principles of engineering and interdisciplinary knowledge to identify, analyse, and solve complex problems in the project domain.
- 2. Develop and execute a comprehensive project plan that includes designing, prototyping, testing, and evaluating a system, component, or process to meet specific needs and constraints.
- 3. Conduct in-depth research, critically review literature, and integrate innovative solutions or techniques within the project framework.
- 4. Demonstrate effective teamwork, communication, and collaboration skills in a multidisciplinary environment to achieve project objectives.
- 5. Incorporate ethical considerations, societal impact, and sustainable practices in the project development, while adhering to professional engineering standards.
- 6. Prepare and present a well-structured project report, supported by technical documentation and visual aids, and confidently defend the work during project viva-voce or presentations.

#### 1. Project Execution

- **Regular Meetings**: Students should meet regularly with their project-guide to discuss progress, challenges, and next steps.
- **Documentation**: Maintain detailed documentation throughout the project in a project workdairy, including design decisions, experiments, and testing results.
- **Milestones**: Set clear milestones and deadlines to ensure steady progress. These could include design completion, initial prototype, testing, etc.

#### 2. Progress Review

- **Progress Presentation**: DPEC shall conduct a mid-term review where students present their progress to a panel of faculty members.
- Feedback: Provide constructive feedback and guidance to help students refine their projects.

#### 3. Final Submission

- **Report**: The final project report should include an abstract, introduction, literature review, methodology, implementation, results, discussion, conclusion, and references.
- Code and Data: If applicable, students should submit their code, datasets, and any other relevant materials.

#### 4. Project Presentations

- **Oral Presentation**: Students should present their projects to a panel, explaining their work, findings, and contributions.
- **Demonstration**: If possible, include a live demonstration of the project or show relevant simulations and results.
- **Q&A**: Be prepared to answer questions from the panel and justify the project's methodology and conclusions.

#### **5. Evaluation Criteria**

- Originality and Innovation: Assess the novelty and creativity of the project.
- **Technical Competence**: Evaluate the depth of technical knowledge and problem-solving ability demonstrated.
- **Project Execution**: Consider the effectiveness of project planning, adherence to timelines, and quality of implementation.
- **Presentation and Communication**: Judge the clarity and coherence of the final report, presentation, and the ability to answer questions.

#### 6. Plagiarism Check

- Academic Integrity: Ensure that the work submitted is original and properly cites all references and sources.
- **Plagiarism Check**: Run all reports through plagiarism detection software and ensure that similarity index is less than the threshold value (25%).

#### 7. Mentorship and Feedback

- **Feedback:** Students are required to consult with their project guide regularly throughout the project work to seek guidance and feedback.
- Weekly Meetings: At least one mentorship meeting every week shall be held and recorded in the project work-dairy.

#### 8. Post Submission

- **Publication**: DPEC shall encourage students to publish their work in conferences or journals, especially if it contributes significantly to their field.
- **Project Archive**: Store all projects in the department's digital archive for future reference.

Continuous Internal Evaluation (CIE)								
Description	Proposed Dates	CIE Weightage						
Description	Proposed Dates	(Max 50 marks)						
1. Progress Review	During the 8 <sup>th</sup> semester	25 marks						
2. Project Report Evaluation	End of the 8 <sup>th</sup> Semester	25 marks						

#### Semester End Examinations (SEE)

3. SEE will be conducted for 100 marks (after the last working day of the 7<sup>th</sup> semester) in the presence of the external examiner with the weightage as **Project Report: 50 marks**, **Project Presentation: 25 marks and Question & Answer Session: 25 marks**. Marks awarded for Project Report is same for all batch-mates.

<b>Course Outcomes:</b> At the end of the course the student will be able to :												
21CBP802.1	Demonstrate the ability to identify, define, and solve complex engineering											
	roblems using appropriate methodologies and modern tools.											
21CBP802.2	Successfully design, develop, and test an engineering solution that meets											
	specified requirements, addressing technical, economic, environmental, and											
	social constraints.											
21CBP802.3	Apply research skills to review existing literature, gather and analyze data,											
	and incorporate innovative or state-of-the-art technologies in the project											
21CBP802.4	Collaborate effectively within a team, taking on leadership or supportive											
	roles as needed, while ensuring clear communication and efficient project											
	management.											
21CBP802.5	Demonstrate awareness of professional ethics, societal impact, and											
	sustainability in the design and implementation of engineering solutions.											
21CBP802.6	Exhibit strong written and oral communication skills by preparing technical											
	reports, project documentation, and delivering persuasive project											
	presentations.

Research/Industry Internship										
Course Code	21INT803	CIE Marks	50							
Course Type	Dreatical	SEE Marks	50							
(Theory/Practical/Integrated)	Practical	Total Marks	100							
Number of Weeks	15 Weeks	SEE	3 Hours							
Number of weeks	15 WEEKS	Credits	10							
	<b>Research Internshi</b>	ip								
Course Learning Objectives:										
1. To equip students with the knowledge of fundamental research principles, methodologies, and										
techniques applicable to their engineering discipline.										

- 2. To enable students to formulate research questions, design experiments or studies, and use appropriate data collection and analysis tools.
- 3. To foster the ability to think critically and innovatively while solving complex engineering problems during the research process.
- 4. To guide students in developing the skills necessary for writing clear and well-structured research reports, papers, and presentations.
- 5. To instill an understanding of ethical practices in research, including integrity, responsible data handling, and respect for intellectual property.
- 6. To prepare students to work effectively in research teams, communicate their ideas clearly, and present their findings to both technical and non-technical audiences.

#### **Pre-Internship Preparation**

- 1. **Orientation Session:** Attend an orientation session with the academic mentor (allotted from the Department) and the Research Supervisor to understand the research goals, expectations, and assessment criteria.
- 2. **Documentation:** Complete necessary documentation, including the approval from the Department, processing of the internship request application, research agreements and confidentiality agreements, if applicable.
- 3. **Research Proposal:** Develop a research proposal in consultation with the Research Supervisor and academic mentor outlining the objectives, methodology, and expected outcomes.

#### **During the Internship**

- 1. Work Plan: Follow a structured research plan provided by the supervising researcher or mentor.
- 2. Literature Review: Conduct a comprehensive literature review to understand the current state of research in the chosen area.
- 3. **Regular Meetings:** Participate in regular meetings with academic and research mentors to discuss progress, challenges, and next steps.
- 4. Lab Work/Field Work: Engage in experimental work, simulations, or field studies as required by the research project.
- 5. **Data Collection and Analysis:** Collect, analyze, and interpret data using appropriate tools and techniques.
- 6. **Documentation:** Maintain detailed records of research activities, experiments, and findings.

Deliverables

- 1. Weekly Reports: Submit weekly progress reports to academic and research mentors.
- 2. Monthly Reports: Submit monthly progress reports to academic and research mentors.
- 3. **Mid-Term Review:** Participate in a mid-term review meeting to assess progress and realign research goals if necessary.
- 4. **Report and Research Paper:** Prepare a draft report and a research paper detailing the research problem, methodology, results and discussions, and conclusions.
- 5. **Presentation:** Deliver a presentation summarizing the research work to faculty, peers, and other stakeholders upon completion of the internship.

	Assessment Criteria
1.	Research Quality: Evaluate the quality and rigor of the research conducted.
2.	Report Quality: Assess the clarity, organization, and thoroughness of the report and the
	research paper.
3.	<b>Presentation:</b> Evaluate the effectiveness and clarity of the final presentation.
4.	<b>Innovation and Creativity:</b> Consider the originality and innovative aspects of the research.
~	

5. **Self-Reflection:** Review the student's ability to critically reflect on their research experience and identify areas for future growth.

#### Post-Internship

- 1. **Feedback Session:** Attend a feedback session with academic mentors to discuss the research experience and areas of improvement.
- 2. **Publication:** Explore opportunities to publish the research findings in academic journals or conferences.
- 3. **Networking:** Maintain professional relationships established during the internship for future research collaborations.

#### **Additional Tips**

- **Curiosity:** Cultivate a curious mindset and a willingness to explore new ideas.
- Collaboration: Work collaboratively with other researchers and team members.
- Adaptability: Be open to modifying research approaches based on findings and feedback.
- **Communication:** Develop strong written and oral communication skills to effectively present research findings.
- **Time Management:** Prioritize tasks and manage time efficiently to meet research deadlines.

Evaluation Scheme									
	Will be conducted during the 7 <sup>th</sup> semester BE. Students shall submit the								
<b>Continuous Internal</b>	Research Internship Proposal and make a presentation and answer questions								
<b>Evaluation (CIE): I</b>	raised by the Departmental Internship Evaluation Committee (DIEC).								
(Only OFFLINE)	Marks split-up: Research Internship Proposal - 50 marks + Oral								
	Presentation-25 marks + Question and Answer-25 marks.								
	Will be conducted during the middle of the 8 <sup>th</sup> semester BE. Students shall								
Continuous Intornal	submit the Reports (daily/weekly/monthly reports), make a presentation on								
Continuous Internal Evolution (CIE), II	progress done so far and answer questions raised by the Departmental								
Evaluation (CIE): II	Internship Evaluation Committee.								
(ONLINE/OFFLINE)	Marks split-up: Reports – 50 marks + Oral Presentation-25 marks +								
	Question and Answer-25 marks.								
	Will be conducted at the end of the 8 <sup>th</sup> semester BE. Students shall submit								
<b>Continuous Internal</b>	the Reports (daily/weekly/monthly reports) and the final internship report,								
<b>Evaluation</b> (CIE):	make a presentation on work completed and answer questions raised by the								
III	Departmental Internship Evaluation Committee.								
(Only OFFLINE)	Marks split-up: Reports – 50 marks + Oral Presentation-25 marks +								
	Question and Answer-25 marks.								
<b>CIE Marks</b>	Average of the CIE.I. CIE. II and CIE.III merice								
(Max 100)	Average of the CIE:1, CIE-11 and CIE:111 marks								
	Will be conducted within a week of the last working day of the 8 <sup>th</sup> semester								
Somester End	BE. Student shall submit the internship report approved by all the								
Semester-Enu- Examinations (SEE)	concerned, make a presentation and answer the questions raised by the								
$\mathbf{Examinations} (\mathbf{SEE})$	internal and external examiners.								
(Unity OFFLINE)	Marks split-up: Reports – 50 marks + Oral Presentation-25 marks +								
	Question and Answer-25 marks.								

Course Outcomes: At the end of the course the student will be able to:											
21INT803.1	Apply appropriate research methodologies and tools to design and conduct experiments, analyze data, and draw conclusions.										
21INT803.2	Demonstrate the ability to identify and solve complex engineering problems										
	through innovative and systematic research approaches.										
21INT803.3	Acquire proficiency in using advanced technologies, tools, and techniques relevant										
	to their field of research.										
21INT803.4	Develop skills in writing comprehensive research reports, documentation, and										
	effectively presenting research findings.										
21INT803.5	Understand and apply ethical standards in research, including plagiarism										
	avoidance, proper citations, and data integrity.										
21INT803.6	Gain experience in working collaboratively within a research team and										
	contributing effectively to the shared goals of the project.

1. Performance Evaluation: Reco	eive feedback from the	e industry mentor ba	sed on work									
performance, technical skills, and	professional behaviour.											

- 2. **Report Quality:** Evaluate the quality, clarity, and comprehensiveness of the final report.
- 3. **Presentation:** Assess the effectiveness and clarity of the final presentation.
- 4. **Self-Reflection:** Review the student's ability to critically reflect on their learning experience and identify areas for future growth.

#### **Post-Internship**

- 1. **Feedback Session:** Attend a feedback session with academic mentors to discuss the internship experience and areas of improvement.
- 2. Certification: Obtain an internship completion certificate from the host organization.
- 3. **Networking:** Maintain professional relationships established during the internship for future opportunities.

#### **Additional Tips**

- **Professionalism:** Demonstrate a professional attitude and work ethic at all times.
- Adaptability: Be open to learning and adapting to new environments and technologies.
- **Communication:** Develop strong communication skills to effectively collaborate with colleagues and mentors.
- **Time Management:** Prioritize tasks and manage time efficiently to meet deadlines.

	Evaluation Scheme									
<b>Continuous Internal</b> <b>Evaluation (CIE): I</b> (ONLINE/OFFLINE)	Will be conducted during the middle of the 8 <sup>th</sup> semester BE. Students shall submit the Reports (daily/weekly/monthly reports), make a presentation on work done so far and answer questions raised by the Departmental Internship Evaluation Committee. Marks split-up: Reports – 50 marks + Oral Presentation 25 marks + Question and Answer 25 marks.									
<b>Continuous Internal</b> <b>Evaluation (CIE): II</b> (Only OFFLINE)	Will be conducted at the end of the 8 <sup>th</sup> semester BE. Students shall submit the Reports (daily/weekly/monthly reports) and the final report, make a presentation on work completed and answer questions raised by the Departmental Internship Evaluation Committee. Marks split-up: Reports – 50 marks + Oral Presentation 25 marks + Question and Answer 25 marks.									
CIE Marks (Max 100)	Average of the CIE:I and CIE:II marks									
Semester-End- Examinations (SEE) (Only OFFLINE)	Will be conducted within a week of the last working day of the 8 <sup>th</sup> semester BE. Student shall submit the internship report approved by all the concerned, make a presentation and answer the questions raised by the internal and external examiners. Marks split-up: Reports – 50 marks + Oral Presentation 25 marks + Question and Answer 25 marks.									

**Course Outcomes:** At the end of the course the student will be able to:

21INT803.1	Apply engineering concepts and theoretical knowledge to solve real-world industry problems.										
21INT803.2	Enhance their problem-solving abilities by identifying, analyzing, and providing innovative solutions to engineering challenges in the industry.										
21INT803.3	Develop key professional skills such as teamwork, communication, and time management in a corporate or industrial environment.										
21INT803.4	Gain exposure to industry-standard tools, technologies, methodologies, and regulatory standards relevant to their field of study.										
21INT803.5	Demonstrate understanding and adherence to professional ethics, safety regulations, and responsibilities in an industrial setting.										
21INT803.6	Build a network of industry professionals and gain insights into career opportunities, preparing them for future employment in the engineering sector.

## **Core Values of the Institution**

#### SERVICE

A Josephite will keep service as the prime goal in everything that is undertaken. Meeting the needs of the stakeholders will be the prime focus of all our endeavors.

#### EXCELLENCE

A Josephite will not only endeavor to serve, but serve with excellence. Preparing rigorously to excel in whatever we do will be our hallmark.

#### ACCOUNTABILITY

Every member of the SJEC Family will be guided to deliver on assurances given within the constraints set. A Josephite will always keep budgets and deadlines in mind when delivering a service.

#### **CONTINUOUS ADAPTATION**

Every member of the SJEC Family will strive to provide reliable and continuous service by adapting to the changing environment.

#### COLLABORATION

A Josephite will always seek to collaborate with others and be a team-player in the service of the stakeholders.

## **Objectives**

- Provide Quality Technical Education facilities to every student admitted to the College and facilitate the development of all round personality of the students.
- Provide most competent staff and excellent support facilities like laboratory, library and internet required for good education on a continuous basis.
- Encourage organizing and participation of staff and students in in-house and outside Training programmes, seminars, conferences and workshops on continuous basis.
- Provide incentives and encouragement to motivate staff and students to actively involve in research-innovative projects in collaboration with industry and R&D centres on continuous basis
- Invite more and more number of persons from industry from India and abroad for collaboration and promote Industry-Institute Partnership.
- Encourage consultancy and testing and respond to the needs of the immediate neighbourhood.
